LaCie blue eye vision

Precise LCD and CRT calibration

COMPATIBLE WITH MAC OS X AND PC

The LaCie blue eye vision performs hardware calibration on LaCie electronblue CRT monitors, and was designed to deliver precise color control in Mac and PC environments.
This device ships with calibration software for Mac OS 9, Mac OS X, Windows 98, Windows 2000 and Windows XP.
With the use of a digital adapter, a single blue eye vision can calibrate all monitors in a multi-workstation environment.

CONSISTENT COLOR

Ideal for color correction in pre-press, Web design and digital content creation environments, the blue eye offers ColorSync™ compatibility for Macintosh applications and ships complete with comprehensive calibration software. A profile can be created to be used with all ColorSync-compatible applications like Adobe Photoshop®, Adobe Illustrator®, Adobe PageMaker®, Adobe InDesign®, and QuarkXPress™

ACCURATE HARDWARE CALIBRATION

Using a unique video cable that allows for two-way communication between the computer and a LaCie electronblue monitor, the blue eye individually adjusts each electron gun (red, green and blue) during hardware calibration. It then creates an ICC profile, which allows users to transfer images among systems and applications without compromising color fidelity. This process, along with the electronblue's color-enhancing hood and non-reflective casing, ensures consistently accurate colors in any lighting situation.

SOFTWARE CALIBRATION

A sturdy docking base allows you to swap two removable sensor attachments — one for hardware calibration on CRT displays, and the other for software calibration on LCD displays. This compact device also intuitively makes necessary adjustments to compensate for room lighting.

Microsoft® Windows® Compatible

Mac

- Hardware calibration for LaCie CRT displays
- Software calibration for LaCie LCDs
- Precise color control for Mac OS X and PC
- Simple setup and operation

LaCie blue eye vision

FEATURES

- Ships with calibration software for Mac and PC
- Cross-platform convenience to adjust all monitors in an office
- Create ICC profiles
- Two attachments for use with LCD and CRT displays
- Individually adjusts each electron gun (red, green and blue)
- Use with ColorSync™ – compatible applications

ACCESSORIES

- Digital adapter (VGA and USB)
- Cable weight
- Cable hooks
- CRT and LCD attachments
- Docking base
- LaCie Utilities CD including user's manual and calibration software

SYSTEM REQUIREMENTS

- Mac OS 9 or Mac OS X; Windows 98, Windows 2000 or Windows XP

LaCie blue eye vision		
	Model	blue eye vision
	Part number	107481
	Model	blue eye cable kit*
	Part number	105160

*NOTE: A digital adapter is included when you purchase a blue eye.
